

AYOT
SMART HOME

What is AYOT

AYOT is an IOT platform solution for Iranian life good companies to enter the realm of IOT and Smart Home, without having to start a whole new software division!

What is AYOT

We let the hardware manufacturers do what they do best, and we will provide the best software to go with it.

Why is AYOT

Because reinventing the wheel is usually not the best solution!

It costs quite a lot for every manufacturer to build their own platform, applications, servers and software division!

Also it's not the best experience for the end user to have to switch between dozens of applications to control different devices manufactured by different brands.

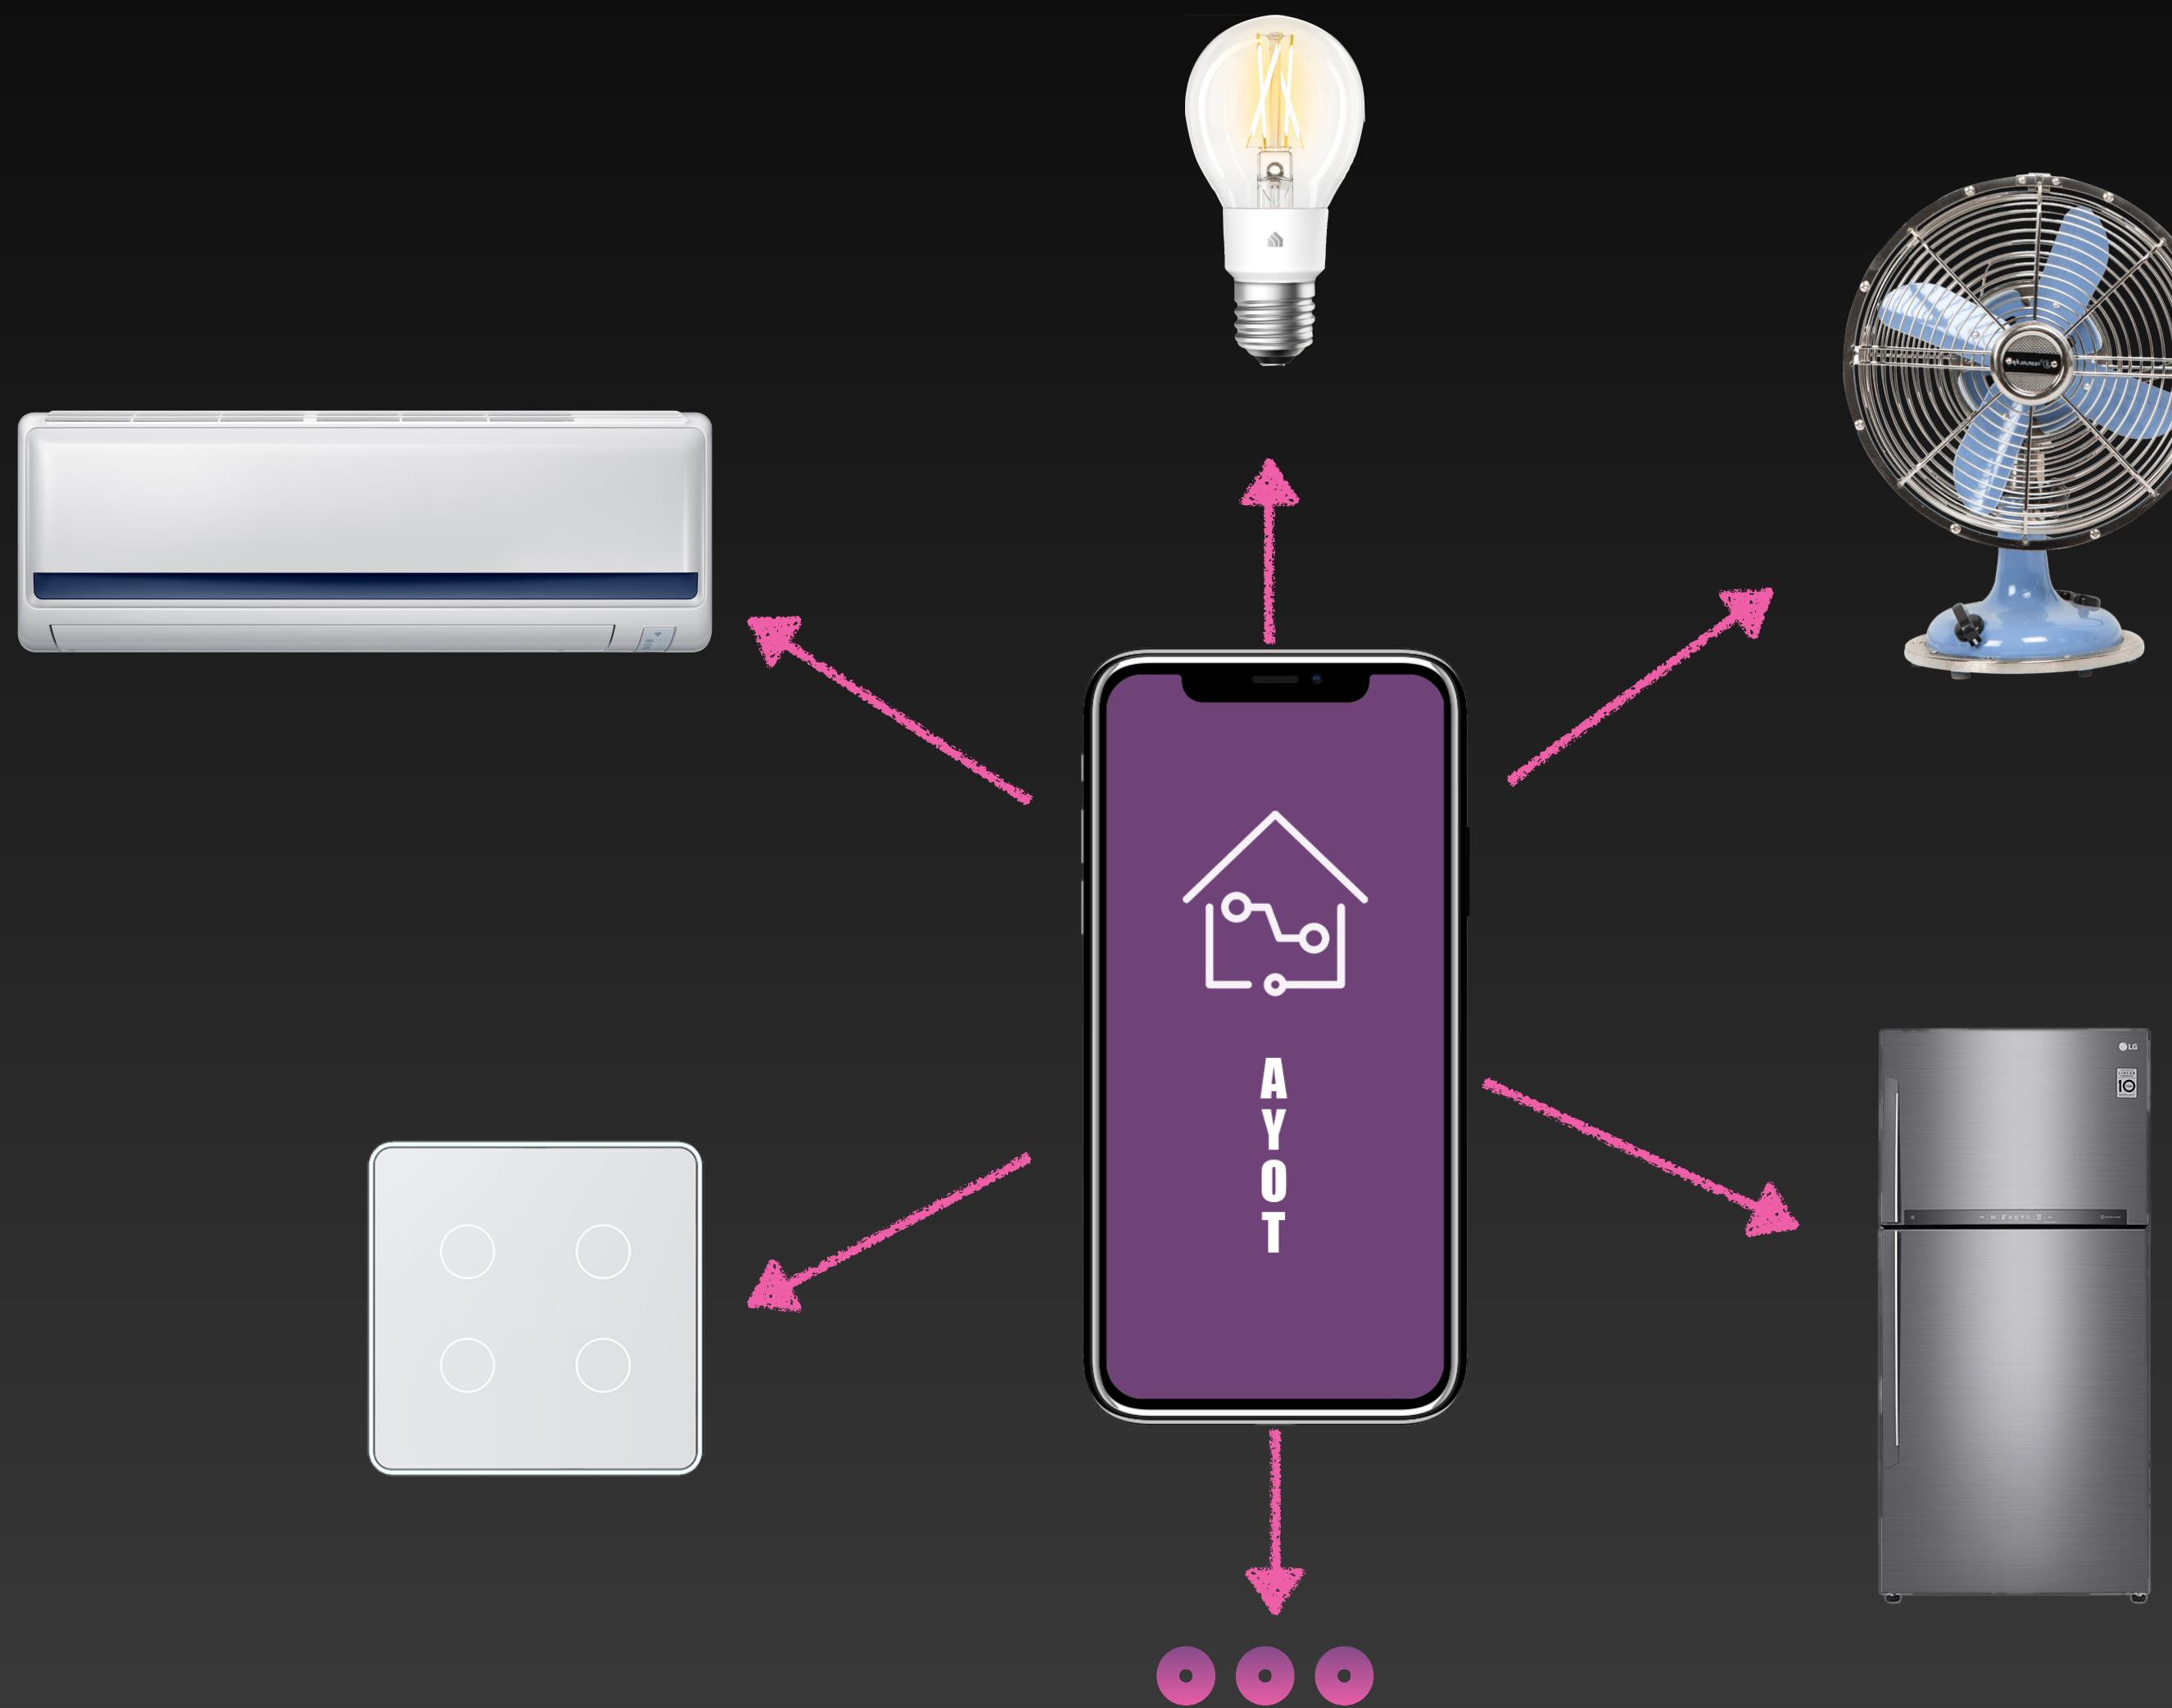

Why is AYOT

AYOT is here to help develop the market for IOT and smart houses
in Iran

How is AYOT

- ⌚ One harmonious ecosystem for all your devices
- ⌚ Powerful and well designed applications for all your systems
- ⌚ Free for the end user
- ⌚ Powerful scheduling and automation between all devices
- ⌚ High security and Privacy
- ⌚ Fast!
- ⌚ Accessible from anywhere ... as long as you're online

How is AYOT

How is AYOT gonna make money

For each smart device powered by AYOT, the manufacturer of the device will pay a calculated amount (based on the device) to AYOT therefore using the services will be free of charge for the end user.

Who is AYOT

Sae Saadat

Founder and CEO

Application and Backend developer
